ExtensionMethods

Create a Console Application that have a class

MyExtensions as the following :

```
namespace ExtensionMethods
{
    static class MyExtensions {

        public static int MyParseInt(this string s) {
            return int.Parse(s);
        }
        public static string MyTitleCaseString(this
        string s)
        {
         System.Globalization.CultureInfo c =
         new System.Globalization.CultureInfo("vi-VN");
            return c.TextInfo.ToTitleCase(s);
        }
    }
    class Program
    {
        static void Main(string[] args)
        {
            Console.Write("Enter a number :");
            int n = Console.ReadLine().MyParseInt();
            Console.WriteLine("n = {0}",n);
            Console.Write("Enter a string :");
            string s = Console.ReadLine();
            Console.WriteLine(s.MyTitleCaseString());
            Console.ReadLine();
        }
    }
}
```
